Racial Misclassification

Cancer estimates for Al/AN may be obscured when Al/AN are incorrectly classified as another race (usually White) in public data sources. Each year the NW Tribal Registry partners with the three Northwest state cancer registries to correct Al/AN racial misclassification and improve cancer estimates for Northwest Al/AN. Please contact us if you are interested in additional cancer data for your community.

Data Notes

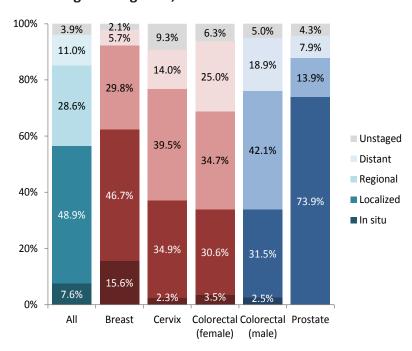

- Unless specified as non-Hispanic White (NHW), all data are for American Indian or Alaska Native (AI/AN alone or in combination with another race) residents of Idaho, Oregon, or Washington, diagnosed from 2003-2007
- Unless specified, counts (n) and proportions (%) include all reportable cancer sites and stages
- Rates are interpreted as the number of cases (or deaths) that would occur in a population of 100,000 people over one year. All rates are age-adjusted to the 2000 US standard population.
- Incidence rates include invasive cancers plus in situ urinary bladder.
- Mortality rates are incidence-based and include a death from any type of cancer. These are based on cancers diagnosed from 1992-2007, and do not represent complete mortality.
- Blood cancers include leukemia, Hodgkin lymphoma, non-Hodgkin lymphoma, and multiple myeloma
- Data are from Cancer Data Registry of Idaho, Oregon State Cancer Registry, and Washington State Cancer Registry; compiled by Northwest Tribal Registry Project and Northwest Tribal Cancer Control Project, NPAIHB
